

AMPEROMETRIC TRANSFORMERS

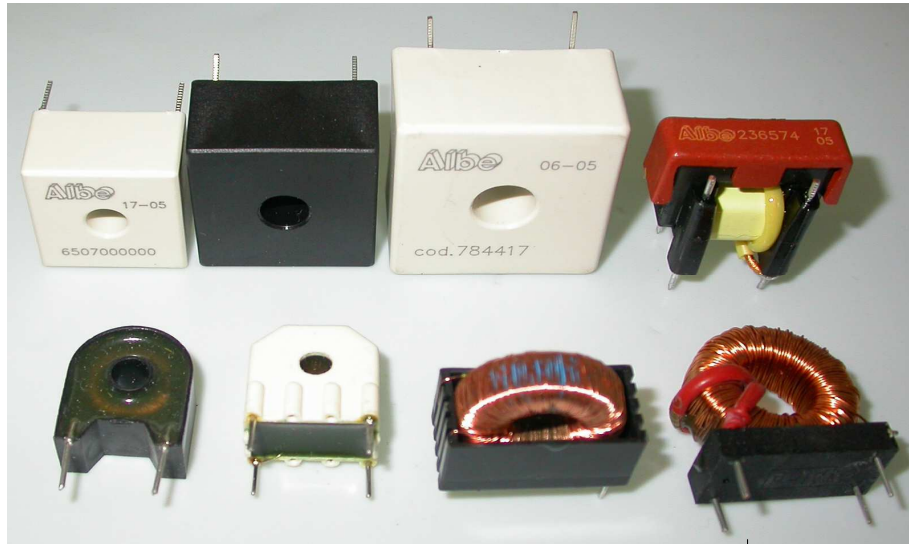

The amperometric transformers are made with amper values from 1 through 900 A

Typical ratios are 1/100 1/200 1/500 1/1000, other ratios on request

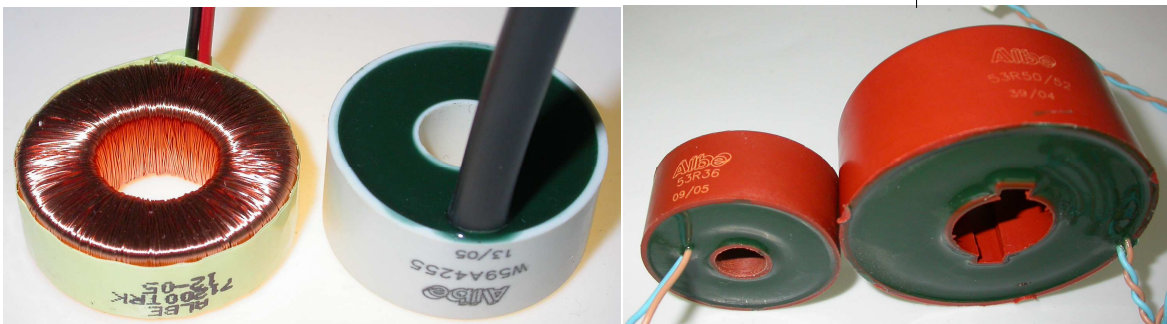

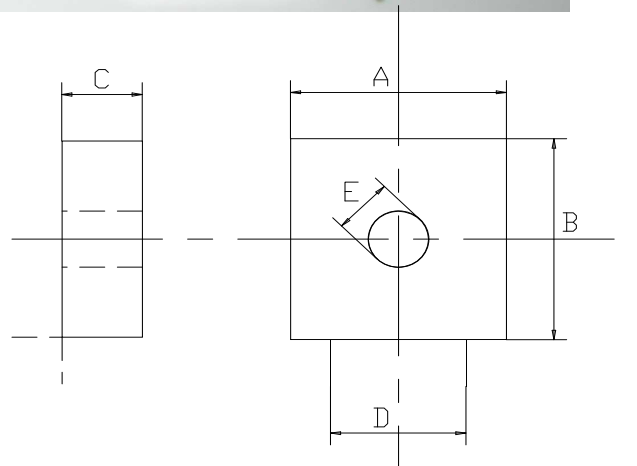

It is possible, for low ampere value, realize the primary turns directly on the core.

We can make the finish : open with cables, in horizontal or vertical box, in round box with cables

The central design reproduce the box in the photo that it is possible mounting vert. or horiz.

	1	2	3
A=	22	27	32
B=	22	27	33
C=	13	15	18
E=	6	7	9
D1=	10	12.5	12.5
D2=	12.5	20	20
D3=	20		

DIMENSION	D EXT.	31	D INT.	10	H	16
ROUND		41		10		20
BOX		62		20		32
